EXPERIENCE

AIML INTERNSHIP AT YOUNG INDIAN REVOLUTION JOURNALS Pvt. Ltd. 1 May 2025 to 31 July 2025

In the capacity of an AI/ML Intern, I Built and evaluated ML models. Performed data preprocessing and feature preparation. Assisted in model deployment and collaborated on AI solutions.

PROJECTS

AI Chatbot

Developed an AI chatbot that responds to user queries with human-like answers.

Loan Approval Prediction

Developed a Loan Approval Prediction system using Python, Pandas, and Scikit-learn. I employed various data science techniques such as data preprocessing, EDA, feature engineering, and classification (Random Forest, XGBoost) to create a predictive model that predicts whether a given loan request will be approved or not.

Human Detection & WhatsApp Alert System

AI-based surveillance system that uses YOLOv8, OpenCV, and Python. It is used to recognize humans in real-time. The system has been automated to send WhatsApp notifications to the owner to inform them of the presence of any human being thereby increasing security levels.

Restaurant Ordering & Management System

Built a full-stack restaurant ordering system where customers can scan a QR code at their table, browse the digital menu, add items to the cart, and place orders. Developed an admin dashboard for real-time order management with live order status updates using Socket.IO and MongoDB.

URL Shortener Platform

Developed a secure URL shortener with user authentication, analytics, and click tracking. Implemented JWT authentication, role-based access control, MongoDB integration, and a responsive dashboard to manage shortened links.

Telegram Search Bot

Created a Telegram bot that searches and retrieves relevant posts based on user keywords. Integrated with a database channel to send full content instead of just links for better user experience.

EDUCATION

Chaudhary Devi Lal University Sep. 2024 – Present

Bachelor of Technology in Artificial Intelligence and Machine Learning

- **Coursework**: Data Structures, Algorithms, Databases, Machine Learning, Deep Learning Operating Systems

SKILLS

Languages: Python, SQL, JavaScript (React.js, Node.js), HTML/CSS

Frameworks & Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, LangChain, OpenCV, Bootstrap,

Databases: MongoDB, MySQL

Core AI/ML Skills: Data Preprocessing & EDA, Ensemble Learning, Cross Validation, Model Evaluation

Tools: GitHub, Git, VS Code, Postman, Google Colab, Jupyter Notebook, Koyeb, Render, Vercel, Heroku

Others: AI/ML Model Development, REST API Integration, Model Deployment (Basic), Performance Evaluation, Problem Solving
